### **SMT Reflow Soldering Instructions**

1.Reflow soldering should not exceed once.

2.In soldering process , do not stress on the LEDs during heating .

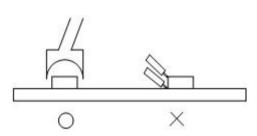

#### Soldering iron

1.When hand soldering, the temperature of the iron must lower than 300  $^\circ\!C$  for 3 seconds 2.The hand solder should be done only one time

#### Repairing

Repair should not be done after the LEDs have been soldered. When repairing is unavoidable, a double-head soldering iron should be used (as below figure). It should be confirmed beforehand whether the characteristics of LEDs will or will not be damaged by repairing.

#### Storage

The package is sealed:

1.Recommended storage condition :At 5°C~30°C and relative humidity 90% RH max.

2.It is recommended that SMD out of their original packaging are used within one year.

The package is opened:

1.Completed within 24 hours.

- 2.Stored at5°C~30°C and 60% RH or less.
- 3.LEDs stored more than 24 hours should be baked at about  $65\,^\circ\!\mathrm{C}\pm\!5\,^\circ\!\mathrm{C}$

for at least 24 hours before solder assembly.

#### **Handling Precautions**

1.Do not stack together assembled PCBs containing LEDs. Impact may scratch the silicone lens or damage.

2.Not available in the situation of acidity for PH.

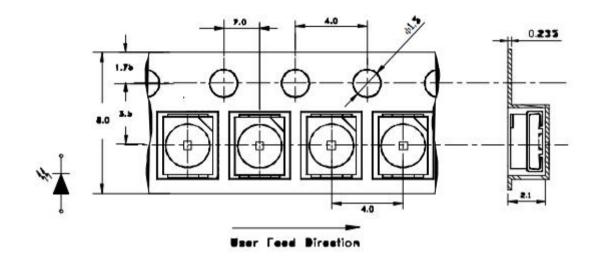

### Packaging

Carrier tape (MPQ:2000PCS/reel)

Note: The tolerances unless mentioned is  $\pm 0.1$  mm, Unit: mm

### **Moisture Resistant Packaging**
